Sir:

Pursuant to 37 C.F.R. §1.56, §1.97 and §1.98, documents that may be material to the examination of this application are listed on the attached Form PTO-1449. Copies of each of the listed documents are enclosed.

Applicant also cites co-pending and commonly owned application Serial No. 29/189,258 filed on August 29, 2003 for CONTAINER CAP as an additional document that may be material to the examination of this application.

No inference should be drawn that the cited documents represent a comprehensive investigation, or that any disclosure in the cited documents is equivalent to the subject invention.

The cited documents disclose numerous specific features. However, there has been no attempt to enumerate each and every feature disclosed by each document. The Examiner is requested to review these documents and to determine the extent of the materiality of the document disclosures, if any, with respect to the present invention.

The discussion of any art and the citation of any document is not to be construed as an admission that the art or document disclosure is necessarily within the invention field of endeavor, that the art or document disclosure is necessarily prior in time to a particular date which may be relevant to the instant patent application, and/or that the art or document disclosure is otherwise necessarily prior art as defined by the patent law with respect to the instant invention and application.

Also, applicant reserves the right to later set forth how the claimed invention is distinguished over the disclosure of any document or other art, including the disclosures of the art and documents recited herein, and that may be cited by the Examiner in rejecting a claim in the instant patent application.

The recitation herein of the art and documents is not to be construed as an assertion that more pertinent art could not possibly be in existence.

Respectfully submitted,
